CAREER SUMMARY

Software Engineer with 2+ years of experience in Angular (TypeScript), .NET Web API, PostgreSQL, and Neo4j. Currently working at Xtract.io on full-stack applications, including Demo Pulse, focusing on API integrations and performance optimization. Previously contributed to the EQ360 ESG Analytics platform. Seeking a Full Stack role.

EXPERIENCE

Xtract.io — Junior Software Engineer (Apr 2024 – Present)

➢ **EQ360 ESG Analytics**

- Contributed to the EQ360 ESG Analytics platform for sustainability data analytics and reporting.
- Developed and maintained Angular modules using TypeScript, focusing on component logic and API integration with .NET Web APIs.
- Used Azure DevOps and Git for version control, commits, and code pushes.
- Fixed critical production issues using root-cause analysis and research-based debugging.
- Improved application performance by optimizing slow pages and removing unnecessary API calls.
- Implemented caching mechanisms to significantly reduce page load times.
- Worked on role-based access control and contributed to interactive dashboards with dynamic graphs and layouts.

➢ **Demo Pulse (Internal Project)**

- Developed Demo Pulse (Phase 1), an internal system for tracking demo feedback and workflows.
- Developed an Angular dashboard enabling real-time analytics and insights.
- Implemented automation workflows using Python for meeting tracking and feedback processing.
- Integrated Google APIs (Sheets, Calendar, Forms, Meet) for seamless data flow.

Mobius Knowledge Services — Software Engineer Intern (Sep 2023 – Apr 2024)

- Assisted in Angular + .NET Web API development, API integration, testing, debugging, and code improvements.

PROJECTS

Gym Management System – Full-stack application using Angular, .NET Web API, and PostgreSQL. Implemented modules for members, plans, payments, reports, and dashboards. Integrated **Razorpay** for secure online payment processing.

EDUCATION

B.Tech – Information Technology 2019–2023

Jeppiaar SRR Engineering College CGPA: 8.4
