SKILLS

Frontend: Angular, TypeScript, HTML, CSS

Backend: .NET Web API, C#

Databases: PostgreSQL, Neo4j

Concepts: REST APIs, CRUD, API Integration, Performance Optimization

Tools: Azure DevOps, Git, Postman/Swagger, Visual Studio, VS Code

TOOLS & WORKFLOW

Azure DevOps, Git (commit/push), Swagger (API testing), Visual Studio, VS Code, Agile basics

AVAILABILITY

Notice Period: 2 Weeks | Open to Chennai / Remote

CAREER SUMMARY

Software Engineer with 2+ years of experience in Angular (TypeScript), .NET Web API, PostgreSQL, and Neo4j. Currently working at Xtract.io on the EQ360 ESG Analytics platform, focusing on Angular application development, API integration, performance optimization, and production bug fixing. Built and deployed a Gym Management System and a product landing page. Seeking a Frontend / Full Stack role.

EXPERIENCE

Xtract.io — Junior Software Engineer (Apr 2024 – Present)

- Working on the EQ360 ESG Analytics platform for sustainability data analytics and reporting.
- Developed and maintained Angular modules using TypeScript, focusing on component logic and API integration with .NET Web APIs.
- Used Azure DevOps and Git for version control, commits, and code pushes.
- Fixed critical production issues using root-cause analysis and research-based debugging.
- Improved application performance by optimizing slow pages and removing unnecessary API calls.
- Implemented caching mechanisms to significantly reduce page load times.
- Built data-driven application screens using HTML and CSS with validations, filters, tables, and popups.
- Worked on role-based access control and contributed to interactive dashboards with dynamic graphs and layouts.
- Actively involved in feature development, functional enhancements, testing, and production releases.

Mobius Knowledge Services — Software Engineer Intern (Sep 2023 – Apr 2024)

- Assisted in Angular + .NET Web API development, API integration, testing, debugging, and code improvements.

PROJECTS

Gym Management System – Full-stack app using Angular, .NET Web API, PostgreSQL, Neo4j. Implemented members, plans, payments, reports, dashboards, CRUD modules, and
